

PELUMI OGUNWOLE

Java Software Developer

pelumiogunwole@gmail.com | <https://www.linkedin.com/in/pelumi-ogunwole-485187157> | +2348062657819

Professional Summary

Experienced in the complete life cycle of software application development from concept to deployment. I am focused at developing APIs and improving server-side performances.

SKILLS

Technologies: Java | Spring Boot | Spring data JPA | Spring MVC | Javascript | React | SQL | MySQL | PostgreSQL | Servlet | Hibernate | CSS3 | HTML5 | Maven | TDD | CI/CD | Git | Mockito | Junit .

Tools: Github | Jira | Microsoft Teams | Postman | Swagger | IntelliJ | VSCode.

WORK EXPERIENCE

Associate Java Engineer

Decagon

May 2022 - Present

- Developed enterprise and web based Restful APIs with Spring boot.
- API testing and documentation using Postman and swagger UI.
- Monitoring, Troubleshooting and improving server-side performance.
- Designed and developed Inventory management systems using spring boot and React.
- Developed MVC application with spring boot for medium scale enterprise.
- Developed and modularized code components for reusability and reducing development time.
- Worked with a quality assurance team to set up scripts, test cases and automation protocols.

Java Backend Developer

Oct 2020 - July 2021

- Implemented payment and email services with spring boot in ecommerce projects.
- Monitoring and troubleshooting issues with web server, database and web technologies.
- Implemented payment and email services in spring boot applications.
- Applied required design principles to build monolithic web applications with spring boot.
- Developed a customized calculator for a convenient store using Java EE.

EDUCATION

Osun State University, Nigeria.

Bachelor of Engineering - BEng, Civil Engineering 2018.

PROJECTS

- **Chomp**

A single food vendor application that enables users to order and get delivery.

Technologies- Java, Spring boot, Spring Data JPA, PostgreSQL, React.

Link: <https://chompfood-9bdbd.web.app/>

- **MyTvTracker**

A Tv tracker application that enables you to track your movie experience using TMDB API.

Technologies- TMDB Api, Postman, React, Netlify.

Link: <https://tv-tracker-app.netlify.app/>

- **Support Shell**

A student support application that enables promising programming students with no funds or loan guarantor get access to tuition by standing in for themselves.

Technologies- Java, Spring boot, Spring Data JPA, PostgreSQL, React.

Link: <https://support-shell-fe.pages.dev/>

- **Fashion Blog**

A RESTful API where users can register, login and can post their fashion contents and comments. Users can also like and dislike posts as well as delete comments and logout.

Technologies- Java, Spring boot, Spring Data JPA, PostgreSQL, Postman.

Link: https://github.com/PelumiOgunwole/fashion_blog

- **Task Tracker**

A RESTful API that allows users to register, login and schedule tasks as well as change the status of the task - pending, in-progress, done and logout.

Technologies- Java, Spring boot, Spring Data JPA, PostgreSQL, Postman.
